Division of Global Pediatrics

UNIVERSITY OF WISCONSIN
SCHOOL OF MEDICINE AND PUBLIC HEALTH

UW Health Pediatric Hospital Medicine Global Health Pathway Individualized Curriculum (8 blocks)

Rotations	Duration (1-4 weeks)	Which year
1. Fundamentals of Global Health GME Course, 1-2 weeks		PGY-4, PGY-5 (both)
<i>A critical portion of each of our GME global health training programs occurs in this annual 1-2 week course, during which trainees are protected from clinical duties. This rare convening of residents, fellows, and faculty across disciplines (Pediatrics, Family Medicine, Anesthesia, Internal Medicine, Obstetrics/Gynecology, & Emergency Medicine) allows attendees to engage in meaningful discussions related to global health topics; participate in global health simulations that portray clinical, cultural, and ethical scenarios encountered internationally; learn procedural-based skills tailored to resource-limited environments; and identify opportunities for engagement and collaboration.</i>		
<i>PHM fellows will participate in two years of a 3-year rolling, longitudinal curriculum, and will have access to the third year of content as recorded lectures if they wish to complete the full curriculum. While the content varies a bit over each 3-year period, our goal is to cover core foundational concepts in global and public health, while also remaining timely and relevant within the ever-changing landscape of global health. Presenters are recruited both locally and nationally/internationally each year, and trainee feedback is carefully reviewed to help inform future topics and course presenters.</i>		
<i>A summary of the 3-year curriculum is provided here, including links to view previously recorded sessions. And our UW Global Pediatric Global Training Passport can be viewed here.</i>		
2. Global Health Elective, 2-4 weeks		PGY-4 and/or 5
<i>A global health elective is a 2-4 week training experience (ideally 4 weeks, but duration varies depending on the opportunity) that occurs in a culturally diverse, resource-limited setting, either internationally or domestically outside of the UW setting (e.g. an Indian Health Services Clinic).</i>		

The above are core components of the individualized curriculum (=2-3 blocks). Additional individualized curriculum blocks can be catered to the trainee's specific goals. Examples could include:

- Transport elective (to gain expertise in IV placement, resuscitation skills), 1-2 weeks
- Point of Care Ultrasound (POCUS) elective, 1-2 weeks
- Additional procedural training opportunities as needed/available, 1-4 weeks
- Leadership / Advocacy training (e.g. American Academy of Pediatrics Advocacy Conference), 1-2 weeks
- Helping Babies Breathe instructor certification (can do during Fundamentals of GH Course, or separately)
- [GHEARD instructor training](#) (Global Health Education for Equity, Anti-Racism, and Decolonization)
- National Conference opportunities. Examples include:
 - American Academy of Pediatrics Section on Global Health (AAP SOGH) annual H program at the NCE (0.5 weeks)
 - Association of Pediatric Program Directors Global Health Learning Community (APPD GHLC) annual spring meeting (0.5 weeks)
 - Children's Hospital of Philadelphia Annual Global Health Conference
 - Consortium of Universities for Global Health (CUGH) Annual Conference (0.5 weeks)
 - Pediatric Academic Societies (PAS) Annual Conference (0.5 weeks, multiple global health events)
 - Other (there are many opportunities)

- Regional conference opportunities
 - Midwest Consortium of Global Child Health Educators) if interested in global health education, 0.5 weeks/year
 - WI State Legislative Advocacy Training (1 day/yr, facilitated through the Peds residency program)
- Subspecialty rotations as needed based on potential areas of interest for global engagement (2-8 weeks)
- Research/independent learning elective, 2-8 weeks (duration depending on goals). Examples include:
 - Topic-specific research projects
 - Online training opportunities (timing required for completion will vary)
 - University of Colorado [Pediatrics in Disasters Course](#)
 - [UW Graduate/Professional Certificate in Global Health](#)
 - Harvard University [Global Health Courses](#)
 - World Health Organization [Academy](#)
 - Additional free online learning can be found [here](#)

Systems/Scholarship blocks (ie. Research, Med ed, QI, Advocacy, Leadership)

See above

Other Opportunities

- Annual UW Global Health Symposium
- Engagement with national networks & workgroups (AAP Section on Global Health, APPD Global Health Learning Community, CUGH, PAS Global Health Interest Group, other)
- Leadership with the Pediatric Residency Global Health Track and the annual Fundamentals of Global Health GME Course

Meetings

See above for conference-related meetings. Additional local optional meetings include:

- Division of Global Pediatrics weekly meeting
- Fundamentals of Global Health GME Course faculty planning meetings
- Monthly evening Global Health Track Sessions

Didactics

The majority of didactic opportunities would be delivered during the Fundamentals of Global Health Course and any additional online courses that fellows opt to pursue.

Certificate requirements

- Completion of the annual Fundamentals of Global Health Course (1-2 weeks x 2 years)
- Completion of a global health elective (international or local/global, 2-4 weeks x 1-2 years)
- Completion of other training elements identified by the fellow to meet global health-specific individualized learning goals
- Written reflection of the global health training experience
